PROTECTING AGAINST DAMAGE

PHYSICAL DAMAGE

The following can cause physical damage to your flooring:

- High pressure points from items such as cookers, washing machines, and other appliances can cause indentation marks. These items can be placed on hardboard sheets, castor cups or an offcut of the flooring to avoid damage.
 - Stiletto heels and sharp objects.
 - Dragging heavy appliances across the floor. Place a sheet of hardboard or an off-cut of carpet beneath such units before repositioning them.
 - Hot or burning objects should be handled with care.
 - Ground-in dirt can be reduced by placing a non-staining doormat at all external doorways.
-

STAIN DAMAGE

The following should be avoided to prevent stain damage:

- Doormats with rubber backing. As an alternative, choose a natural fiber mat or a mat with a non-staining backing.
 - Furniture with rubber legs. Remove the rubber legs altogether or use castor cups or felt pads.
 - Spirit-based products and strongly-colored foodstuffs.
 - Corrosive substances.
 - Bitumen/tar or black driveway sealers stuck under footwear and rubber sole shoes.
-
